

MOHAMMED MUSTAKEEM

Jaipur, Rajasthan, India | +91-9928697153 | [LinkedIn](#) | [GitHub](#)

B.Tech AI/ML student with hands-on experience in Python, ML, embedded systems, and workflow automation. Proven ability to build end-to-end data pipelines and analytics systems. Seeking to apply data-driven problem-solving for user behavior analysis and growth strategy.

EDUCATION

University of Engineering & Management (UEM), Jaipur

May 2023 – May 2027

B.Tech in Computer Science – AI & Machine Learning Specialization

Cumulative GPA: 8.99 / 10.00

Relevant Coursework: Data Structures & Algorithms (Python), Probability & Statistics, DBMS, Computer Networks, Operating Systems, Artificial Intelligence, Machine Learning.

WORK EXPERIENCE

Freelance Data & Automation Consultant

2024 – Present

Independent Projects | Remote

- Built **n8n workflow automations** integrating REST APIs, Webhooks, and CRM tools to streamline data collection and reporting pipelines, reducing manual processing time by ~40%.
- Designed and deployed **user segmentation logic** using Python (pandas, scikit-learn) to categorize behavior patterns from raw engagement data.
- Created automated dashboards and data summaries for client reporting using **Google Colab and Jupyter Notebook**.

PROJECTS

User Retention & Behavior Analytics Dashboard

2025

- Built an end-to-end **Python analytics pipeline** (pandas, matplotlib, seaborn) to simulate tracking user engagement metrics, identifying drop-off points and retention trends.
- Applied **cohort analysis and funnel visualization** to surface re-engagement opportunities and segment inactive users for targeted outreach strategies.
- Delivered **interactive Jupyter reports** with actionable KPIs aligned to growth and retention goals.

Cardiac Arrest Detection System

2024

Python, Raspberry Pi 4, scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib

- Developed and deployed dual ML models on Raspberry Pi 4 achieving **97% accuracy** in real-time cardiac arrest prediction.
- Built end-to-end data pipeline: **sensor data acquisition** → **preprocessing** → **model inference** → **real-time alert**, demonstrating strong data engineering skills on constrained hardware.
- Wrote **unit tests using pytest** to validate data preprocessing pipeline and model inference accuracy.

Car Detection & Distance Estimation System

2024

Python, OpenCV, Raspberry Pi, Ultrasonic Sensor, NumPy, scikit-learn

- Built a **real-time computer vision system** to detect vehicles and measure inter-vehicle distances using sensor fusion.
- Integrated threshold-based alert logic, demonstrating ability to translate **data thresholds into actionable triggers** — directly applicable to CX alert systems.

TECHNICAL SKILLS

Languages: Python, C, Java, SQL (MySQL – Learning), REST APIs

Data & Analytics: pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering, Cohort Analysis, Funnel Analysis

AI/ML: TensorFlow, PyTorch, scikit-learn, Classification, Regression, NLP

Tools & Platforms: MS Excel, Jupyter, Google Colab, Git, GitHub, Cloud Computing, SaaS Tools

Automation: n8n (REST API, Webhooks, JSON, CRM Integration), Make.com, Zapier, Low-code Tools

Embedded Systems: Raspberry Pi (3B, 4), Arduino, ESP32/ESP8266, Home Assistant

Testing: pytest, unittest

Soft Skills: Communication, Collaboration, Analytical Thinking, Presentation

ACHIEVEMENTS & ACTIVITIES

- Winner** – Two pitch-deck competitions at UEM Jaipur Entrepreneurship Cell (2023–2024); Two pitch-deck events in Sustainable Energy & Recycling (2025).

- **Published Research** – Brain–Computer Interface (2023); Developed Hybrid ESP32-Based Smart Home Architecture.
- **NPTEL** – Scored 96/100 in Business Analytics certification.
- **Robotics** – Winner of Robo-Soccer and Tug-of-War competitions; Winner of UEM Jaipur Annual Innovation Competition (2025).
- **Club Member** – Toastmasters International (Literature Fest organizer); IoT & Automation Club TECXARO (Squid Games event organizer).
